nabihazainabjutt@gmail.com | [linkedin/nabihazainab](https://www.linkedin.com/in/nabihazainab) | 0320-4821242

Software Engineering undergraduate with a strong interest in Software Engineering (SE), Software Requirement Engineering (SRE), Software Quality Assurance (SQA), and Mobile Application Development (MAD). Skilled in OOP and web development, with experience in software design and documentation using Use Case, Class, Sequence, Architecture, and ERD diagrams. Familiar with manual testing and basic automation testing concepts. Strong problem-solving skills, a quick learner, and passionate about building reliable and user-focused software solutions.

Education

Riphah International University, Lahore

2023 - Present

Bachelor of Science, Software Engineering

Focus: Software Engineering, Software Requirement Engineering, Quality Assurance, Mobile Application Development.

Skills and Technologies

Languages & Programming

- C++, Java, SQL, Python
- JavaScript, Node.js, [Express.js](#)
- HTML, CSS, MongoDB
- Flutter, Firebase, SQFLite

Tools & Platforms

- Selenium, Jmeter, Jira, ClickUp, Taiga
- VS Code, Android studio IntelliJ, Docker, NetBeans
- Packet Tracer, Draw.io, StarUML
- Figma, Canva, Git/GitHub
- ChatGPT, Claude.AI

Projects

- **Library Management System (C++)**
Developed a console-based application for managing library records with CRUD operations and file handling concepts.
- **Car Racing Game (Unity & C#)**
Developed a multi-scene car racing game using Unity and C#, featuring a main menu, garage, gameplay, end screen, and score panel displaying current score, highest score, speed, and game statistics.
- **E-Bookstore (Web App)**
Built a responsive online bookstore website using modern web technologies with features for browsing and managing books.
- **Streak Master (Web App)**
Developed a productivity and habit-tracking web application focused on maintaining daily streaks and user progress tracking.
- **Cinema Ticket Reservation System (SRS Documentation)**
Created detailed Software Requirements Specification (SRS) documentation including functional/non-functional requirements and UML diagrams such as Use Case, Class, Sequence, Activity, and ERD diagrams.

- **RentalHub (Mobile App)**
Developed a Flutter & Firebase-based house rental application with multi-user functionality, property management features, and complete project documentation with UML diagrams.
- **EMU-8086 Hangman Game (Assembly Language)**
Developed a console-based Hangman game using EMU-8086 Assembly Language, implementing string handling, loops, and conditional logic.
- **Library Management System (Database Project)**
Designed and developed a database-driven Library Management System with multiple relational tables, focusing on efficient data management, CRUD operations, and ERD design.
- **AI-Based Air Drawing System**
Developed an AI-powered application that enables users to draw in the air using hand gesture recognition and computer vision techniques, allowing touch-free digital drawing interaction.

Entrepreneurship Project

- **PromptCut (AI Video Editing Platform) – In Progress**
Developing an AI-powered video editing platform where users upload videos and provide prompts in English to automatically edit and enhance videos based on the given instructions.
- **Hostel Roommate Matching System– In Progress**
Developing a smart roommate matching system where students can add personal information, habits, personality traits, and skills to find compatible roommates. The system also allows skill sharing among students, while admins manage rooms, students, occupancy, and allocations.

Experience

Web Development & AI Prompting Intern

Sept 2025 (4 Weeks)

ADFX-SA (DigiSuite CA)

Completed a structured 4-week internship program focused on web engineering and modern AI productivity workflows.

- Developed web pages, created client-side features, and provided online technical support.
- Utilized AI prompting workflows and productivity tools to build high-converting assets.
- Created graphic designs and digital assets for social media marketing strategies.
- Gained insights into market dynamics and financial trading fundamentals.

App Development Intern

July 2026(4 Weeks)

CodeAlpha

Selected for the App Development Internship Program at CodeAlpha. Responsibilities include building innovative application features, creating optimized frontend interfaces, and implementing clean code patterns.
